

BNB CHAIN L2

BEP-20 Native Token: OMC

Omniverse Compute (OMC)

Decentralized High-Performance GPU Infrastructure Network

Transforming AI Compute Delivery

Idle GPU Activation

Aggregating global compute capacity with zero marginal onboarding cost.

Ultra-Low Gas & Scale

Powered by BNB Chain L2 for high-frequency micro-payments and state updates.

MARKET OPPORTUNITY

Commercial Value of DePIN Compute

50-70%

Compute Cost Reduction

Versus Web2 cloud monopolies

\$1T+

AI & DeAI Potential

Unified data, algorithm, & compute grid

TARGET AUDIENCE

Four Primary Client Segments

AI Startups

LLM fine-tuning & LoRA workloads.

DeAI Projects

24/7 Agent inference & ZK-ML proofs.

3D & VFX Studios

Unreal Engine 5 & Blender rendering.

GPU Providers

Mining farm pivot & consumer hardware.

Three-Tier Network Stack

Settlement Layer

BNB Chain mainnet managing assets, DAO governance, and staking contracts.

Orchestration L2

Ultra-low gas L2 handling node heartbeats and real-time task rewards.

Compute Grid

Cross-platform containerized environment supporting CUDA and ROCm acceleration.

Task Distribution & Matching

1

Task Lockup

Requesters lock OMC token fees.

2

Smart Scheduling

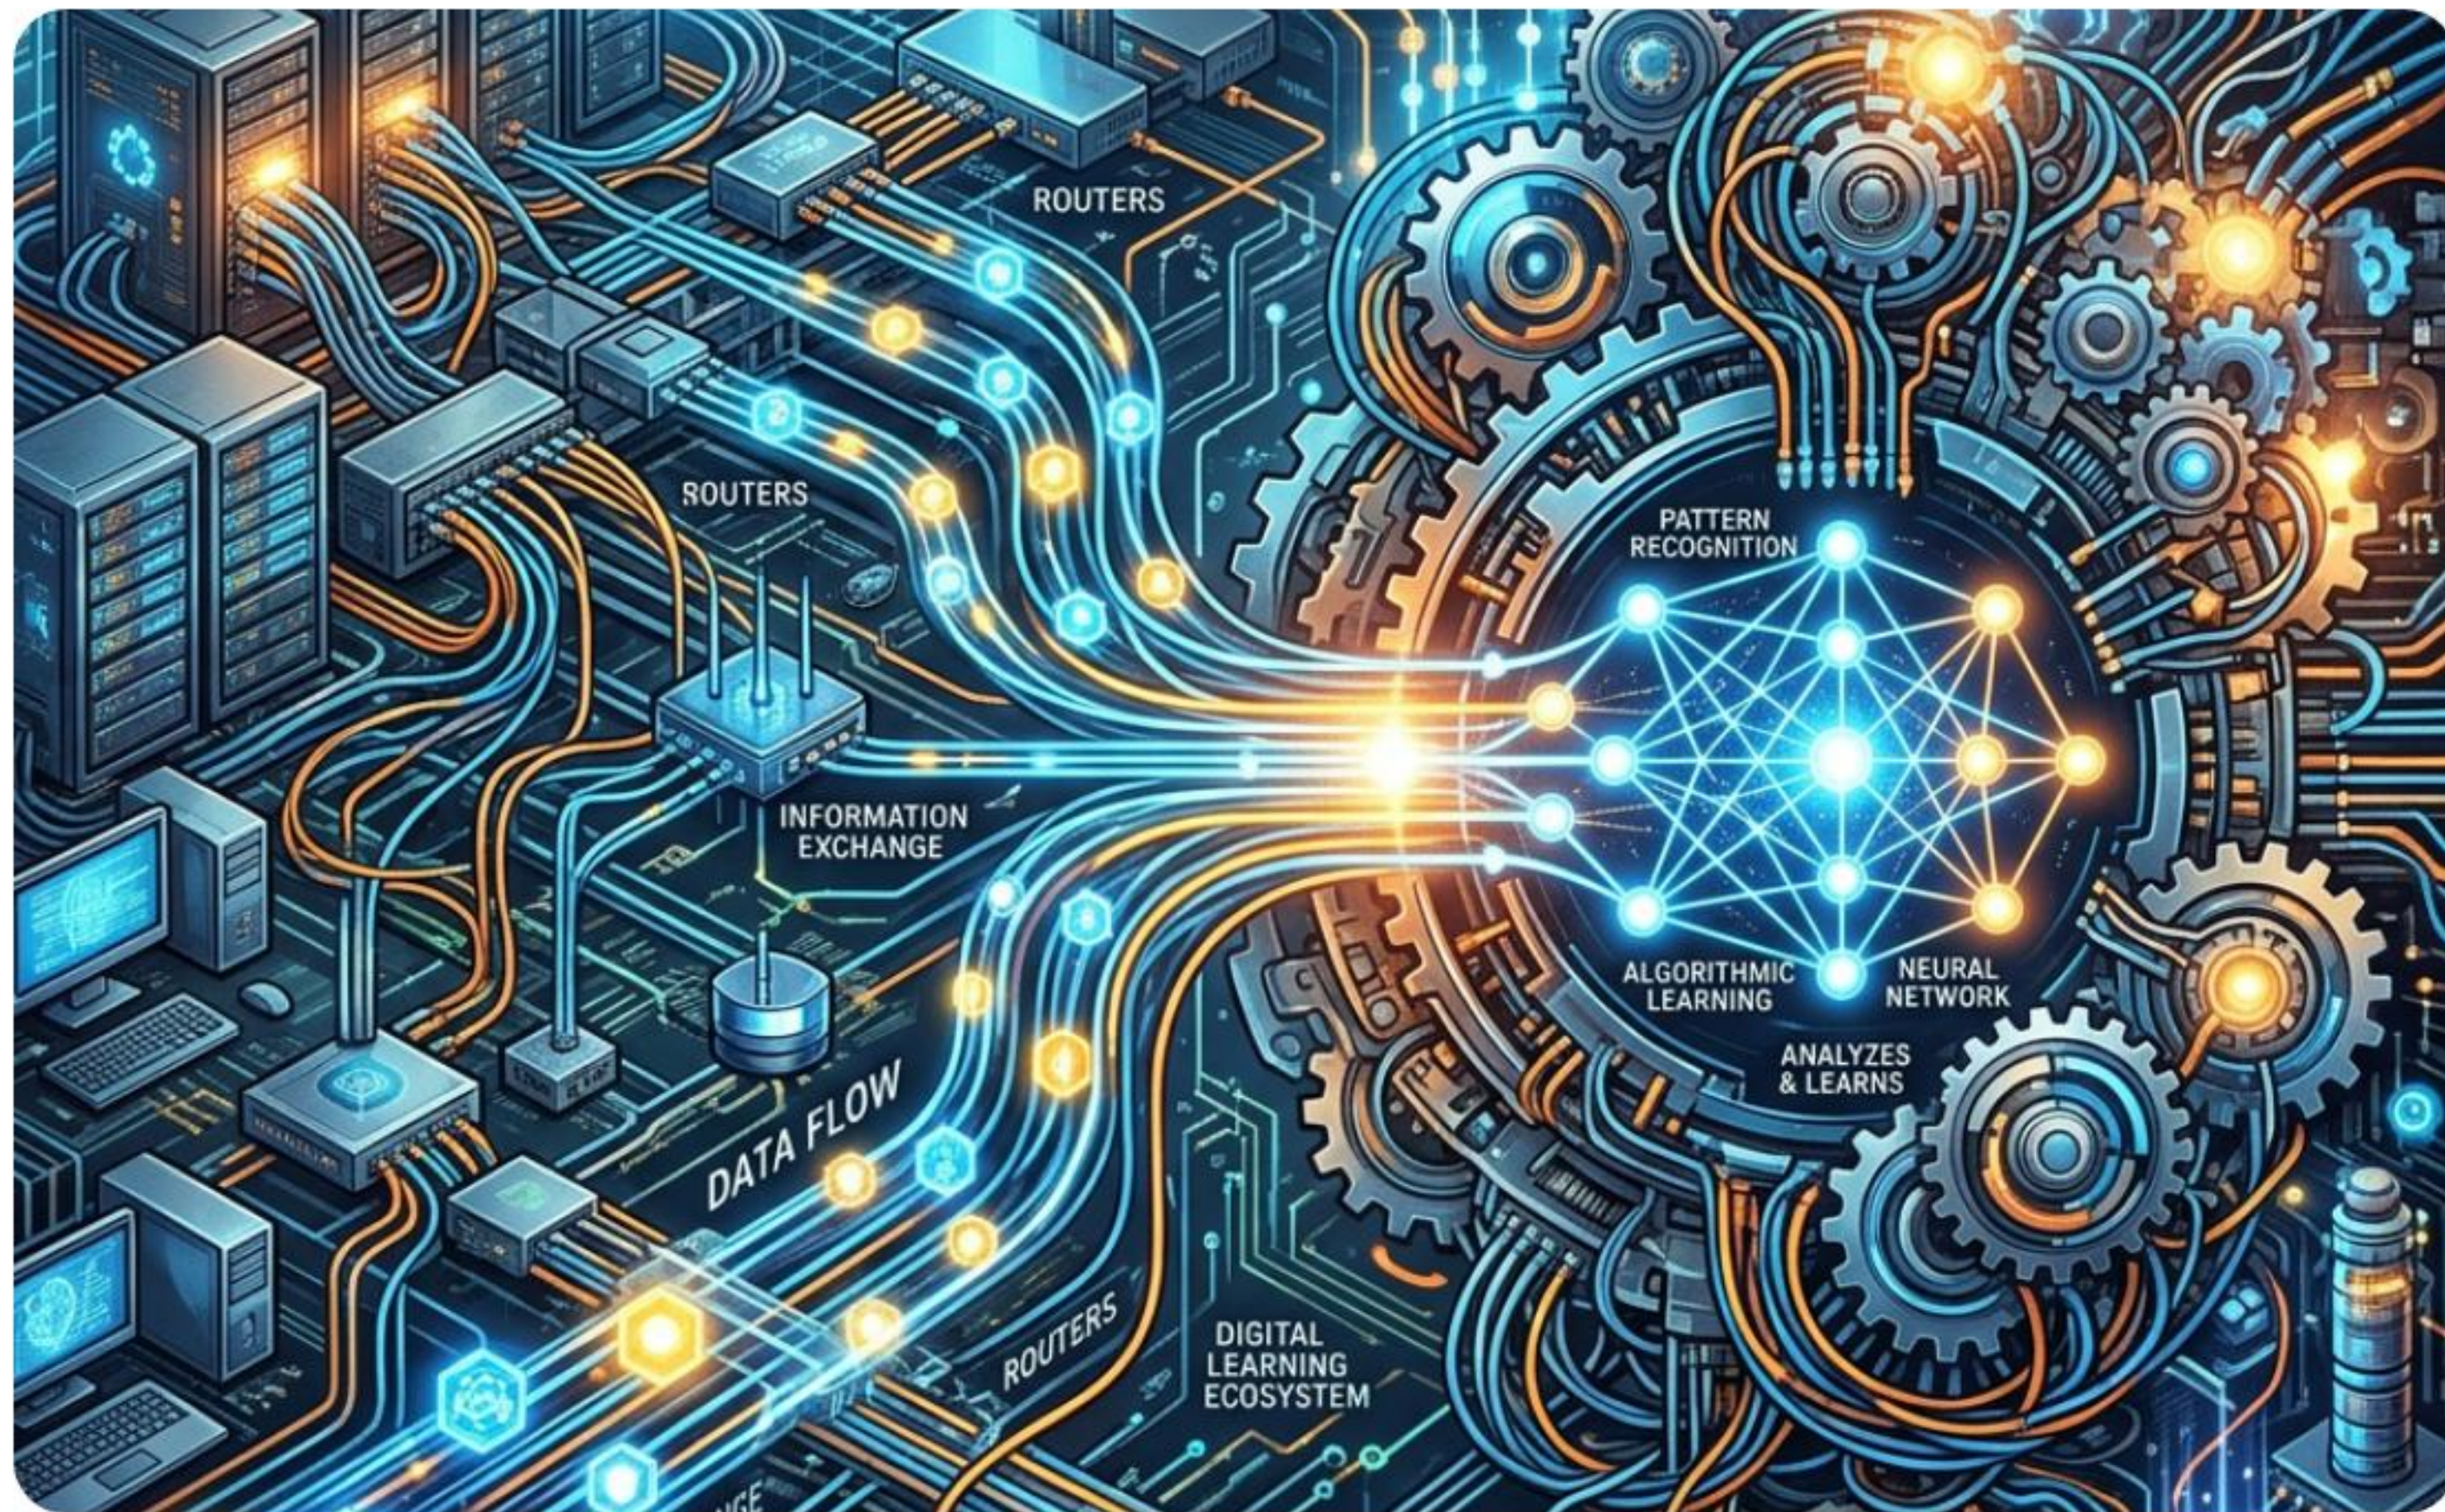

Matched by VRAM and network speeds.

3

Sandbox Execution

Executed in isolated containers.

Node Verification, Staking & Slashing

Redundancy & ZK Proofs

zk-SNARKs sampling with multi-node validation.

Staking & Dynamic Score

OMC collateral required; high score boosts jobs.

Automated Slashing

Fraudulent nodes slashed and requesters compensated.

Token Allocation & Vesting (1B OMC)

Category	Allocation	Amount (OMC)	Vesting Schedule
Compute Mining	50%	500,000,000	10-year linear decay emission
Investors Total	20%	200,000,000	Institutional, Private & 2% Airdrop
Ecosystem & Grants	15%	150,000,000	6m lockup, 36m monthly linear
Team & Contributors	10%	100,000,000	12m cliff, 24m monthly linear
Treasury & Liquidity	5%	50,000,000	50% TGE unlocked for liquidity

Token Utility & Deflationary Mechanics

Compute Payment

Currency for AI training & 3D jobs.

Node Staking

Collateral for execution integrity.

DAO Governance

Protocol parameters & treasury voting.

20-30% Buyback & Burn

Service fee burn for value capture.

BUILDING THE FUTURE OF DEAI

Powering the Next-Gen Global AI Grid

Thank you! Join us in shaping the future of Omniverse
Compute.
